

Highlights for OEC program this year.

- We registered and closed 68 different courses – including refreshers, instructor refreshers, the IT refresher, four different hybrid OEC courses and dozens of enhancement clinics around region.
- We added several new OEC instructors to the line-up this year.
- We added two new OEC ITs (both at Sunday River)
- Personally, I managed to attend six different refreshers, as a participant, IT or assisting instructor.
- We had one long-time IT announce his retirement –
- We inventoried and restocked the region OEC training bags
- Joint Black Mountain/Lost Valley OEC course that provided 18 new patrollers to four different patrols in the region.

-Goals for next 20-21

Have a normal ski season 😊

1. OEC 6 ---

2 Another joint OEC candidate course centrally located

3. Expand the mountain host/first care program to additional patrols beyond Sunday River – There is a fair amount of interest from at least two different patrol directors in doing this.

4. Increase the number of OEC instructors that are available to certain patrols. We have a couple that need a few more instructors – need a plan for that.

5. Again inventory and restock OEC training bags.

6. Moulage kit, needs some updates --- we've used it a fair amount the last two seasons and it could use a refresh in supplies.
